Summary

Data Science undergraduate skilled in SQL, Python, and BI dashboarding, with hands-on experience turning raw business data into decisions and early exposure to LLM/RAG-based data tools.

Education

Vellore Institute of Technology

2022 – 2027

Integrated M.Tech, Computer Science (Computational & Data Science)

Skills

- **SQL & Databases:** SQL, PostgreSQL, MySQL
- **Programming & Analysis:** Python, Pandas, NumPy, EDA, Statistical Analysis
- **BI & Visualization:** Power BI, Data Modelling, Plotly, Matplotlib, Seaborn, Excel, Dashboarding
- **AI/LLM Tooling:** LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering
- **Other:** Data Cleaning, Business Reporting, Git/GitHub

Experience

Data Analytics Intern

Jan 2026 – Feb 2026

S. S. Heavy Equipments Pvt. Ltd.

Pune, India

- Explored 2+ years of enterprise sales data spanning 50,000+ records to identify market trends, revenue patterns, and actionable business insights.
- Evaluated revenue variance across 4 product verticals, uncovering performance gaps and highlighting a 12% targeted growth opportunity.
- Delivered structured analytical dashboards for 10+ cross-functional stakeholders, streamlining reporting workflows and reducing ad-hoc data queries by 30%.

Python Developer Intern

Oct 2025 – Dec 2025

Proton Engineering Consultancy & Services

Thane, India (Hybrid)

- Engineered a Python-based document processing pipeline capable of handling 500+ PDF resumes daily with 92% extraction accuracy.
- Streamlined resume screening through workflow automation, saving HR teams approximately 20 hours per week and reducing recruitment processing time by 40%.

Projects

Customer Shopping Behavior Analysis | Python, PostgreSQL, SQL, Power BI | 

Sept 2026

- Engineered a data-cleaning workflow using Pandas and NumPy to preprocess multi-category customer transaction data, resolve missing values, and standardize records for downstream analysis.
- Leveraged PostgreSQL and SQL to segment customers, evaluate purchase frequency, and uncover category-level spending patterns across the dataset.
- Transformed analytical findings into an interactive Power BI dashboard, integrating spending, purchase frequency, and satisfaction metrics into a centralized business intelligence view.

TrueContext – GenAI Document Assistant | Python, LangChain, RAG, Docker | 

Jan 2026

- Architected a Retrieval-Augmented Generation (RAG) workflow for natural-language querying and semantic retrieval across 1,000+ document records.
- Optimized embedding-based retrieval to improve response relevance by 35%, while packaging the application with Docker to support consistent deployment.
- Designed a modular LangChain pipeline connecting document ingestion, chunking, and vector search, enabling the assistant to answer context-aware queries in real time.

TalentInsight – AI Resume Analytics Dashboard | Python, NLP, Pandas, Plotly | 

Dec 2025

- Developed an NLP-driven extraction pipeline that identified 20+ candidate skills across 500+ profiles and applied weighted scoring to support structured candidate evaluation.
- Crafted interactive Plotly visualizations to surface candidate insights, accelerating the shortlisting process by 50% and reducing reported time-to-hire by 15%.
- Consolidated resume metadata and scoring results into a unified Pandas-driven dashboard, giving recruiters a single view for comparing candidates side by side.

Extracurricular

Event Management Lead, VIT Clubs

Mar 2024 – Sep 2025

- Led a 15-member team on logistics, registration & crowd coordination for events reaching 2,000+ attendees.
- Coordinated event execution across multiple activity teams, ensuring timely task completion and smooth attendee experience during large-scale campus programs.
